Backend-focused Systems Engineering student with hands-on experience designing and implementing scalable web applications using **Java (Spring Boot)**, **Python**, and modern backend architectures. Strong foundation in **RESTful APIs**, **microservices**, **real-time communication (WebSockets, gRPC)**, and relational databases. Passionate about building secure, maintainable backend systems and continuously improving software performance and design.

PROJECT EXPERIENCE

Appointments and Administrative Utilities Manager System **Popayán, Colombia**
Full Stack Developer *2025*

- Designed and developed a full-featured appointment and administration platform using **Spring Boot** and **Angular**.
- Implemented **secure authentication and Role-Based Access Control (RBAC)**, improving data protection for multiple user roles.
- Built **REST APIs and WebSocket services** to handle real-time scheduling and notifications.
- Collaborated in an agile team of 4 developers using Git and Scrum practices.

Academic Project Management System **Popayán, Colombia**
Backend Developer *2025*

- Developed a **microservices-based backend architecture** to manage academic projects involving students, companies, and coordinators.
- Built scalable services with **Java and Spring Boot**, ensuring loose coupling and service independence.
- Optimized database queries and inter-service communication to support concurrent users.
- Integrated backend services with a Java Swing client application.

Spotify Backend Simulation **Colombia / Academic**
Backend Developer *2025*

- Co-developed a music streaming backend simulation using **Golang** and **Java**.
- Implemented **WebSockets** for real-time updates and **gRPC** for high-performance service communication.
- Designed relational database schemas to manage users, playlists, and streaming metadata.

EDUCATION

Universidad del Cauca **Popayán, Colombia**
Bachelor's Degree in Systems Engineering *Expected Graduation: 2027*
Relevant Coursework: Software Engineering, Distributed Systems, Databases, Data Structures, Operating Systems.

TECHNICAL SKILLS

- **Backend:** Java (Spring Boot), Python, Golang, REST APIs, Microservices, WebSockets, gRPC.
- **Frontend:** Angular, TypeScript, JavaScript, HTML, CSS.
- **Databases:** PostgreSQL, Oracle Database, MariaDB.
- **Tools & Practices:** Git, Postman, Linux, Agile (Scrum).
- **Languages:** Spanish (Native), English (Intermediate – technical proficiency).

CERTIFICATIONS

Full Stack Empresarial con Spring Boot y Angular — DevSenior *2025*
Certificate ID: e5f3a1e1-5caf-47cb-833e-a6a5b8f3629a

Junior Cybersecurity Analyst Career Path — Cisco *2025*
Certificate ID: a917b782-b2b7-47d4-bf1c-5d370a6df267
